Mouhib CHAMSI

DevOps Engineer

To:

Dear Hiring Manager,

First of all I want to express my gratitude for this wonderful opportunity. My name is Chamsi Mouhib, and I am 23 years old. I am in the final stages of my studies in System and Network Security Engineering at TEK-UP.

Just two years ago, I began with a basic Linux command, and today I'm deeply entrenched in the DevOps realm. My enthusiasm for ongoing learning in the ever-evolving tech landscape truly sets me apart.

Moreover, I actively participate in the KodeKloud Engineer platform, regularly tackling tasks related to Ansible, Kubernetes, Linux, Git, Jenkins, and Docker. I also maintain a personal portfolio (https://chxmxii.github.io/portfolio/) where I jot down notes for future reference.

In addition, I actively engage in Capture The Flag (CTF) challenges, with a specific focus on web challenges. I had the privilege of organizing a CTF competition for newcomers at my university. During this event, I designed user-friendly web tasks to introduce beginners to the world of web security and foster their learning.

Taking advantage of my university's certification offerings, I have obtained certifications such as RHCSA, RHCE, RHCSC(EX188), eJPT, and AWS CCP. To me, certifications represent structured learning paths. I meticulously document my notes and create practice exams to assist others with shared interests. With a dedicated focus on technologies like Kubernetes, I am eager to acquire further certifications and continue sharing knowledge.

Kind Regards,
